Remember that the quality of the defenses, hence the quality of the of the school on the labor market depends on you. The remote defences during the Covid crisis allows more flexibility so you can progress into your curriculum, but also brings more risks of cheat, injustice, laziness, that will harm everyone's skills development. We do count on your maturity and wisdom during these remote defenses for the benefits of the entire community.

SCALE FOR PROJECT MINISHELL (/PROJECTS/42CURSUS-MINISHELL)

You should evaluate 2 students in this team

Git repository

git@vogsphere.kzn.21-school.ru:vogsphere/intra-uuid-25f4

Introduction

Please respect the following rules:

- Remain polite, courteous, respectful and constructive throughout the evaluation process. The well-being of the community depends on it.
- Identify with the person (or the group) evaluated the eventual dysfunctions of the work. Take the time to discuss and debate the problems you have identified.
- You must consider that there might be some difference in how your peers might have understood the project's instructions and the scope of its functionalities. Always keep an open mind and grade him/her as honestly as possible. The pedagogy is valid only and only if peer-evaluation is conducted seriously.

Guidelines

- Only grade the work that is in the student or group's GiT repository.
- Double-check that the GiT repository belongs to the student or the group. Ensure that the work is for the relevant project and also check that "git clone" is used in an empty folder.
- Check carefully that no malicious aliases was used to fool you and make you evaluate something other than the content of the

Intra Projects minishell Edit

official repository.

- Use the flags available on this scale to signal an empty repository, non-functioning program, a norm error, cheating etc. In these cases, the grading is over and the final grade is 0 (or -42 in case of cheating). However, with the exception of cheating, you are encouraged to continue to discuss your work (even if you have not finished it) in order to identify any issues that may have caused this failure and avoid repeating the same mistake in the future.
- Remember that for the duration of the defence, no segfault, no other unexpected, premature, uncontrolled or unexpected termination of the program, else the final grade is 0. Use the appropriate flag.

You should never have to edit any file except the configuration file if it exists. If you want to edit a file, take the time to explicit the reasons with the evaluated student and make sure both of you are okay with this.

- You must also verify the absence of memory leaks. Any memory allocated on the heap must be properly freed before the end of execution.

You are allowed to use any of the different tools available on the computer, such as leaks, valgrind, or e_fence. In case of memory leaks, tick the appropriate flag.

Mandatory Part

Simple Command

- Execute a simple command with an absolute path like /bin/ls or any other command without options

arnothing Yes

Arguments

- Execute a simple command with an absolute path like /bin/ls or any other command with arguments but without quotes and double quotes
- Repeat multiple times with different commands and arguments

6.10.2020	Intra Projects minishell Edit						
	- Have fun with that beautiful minishell and enjoy it						
	igotimes Yes $igotimes$ No						
	Bonus						
	We will look at your bonuses if and only if your mandatory part is excellent. This means that you must complete the mandatory part, beginning to end, and your error management must be flawless, even in cases of twisted or bad usage. So if you didn't score all the points on the mandatory part during this defence bonuses will be totally ignored.						
	double left redirection						
	- Check if << is working fine						
	arnothing Yes $ imes$ No						
	Line editing						
	- Can we move the cursor left and right and edit the line by inserting or deleting characters at cursor location - Can we navigate through history with up and down - Can we copy paste all/part of a line using a key sequence - Can we move word by word with ctrl+left or ctrl+right - Go directly to the beginning or the end of the line with home or end - Write and edit commands with multilines						
	Rate it from 0 (failed) through 5 (excellent)						
	And, Or						
	 Use &&, and parenthesis with commands and check if it works like bash For each working flag give 1 point If all flags are working give 1 bonus point 						
	⊗ Yes × No						
	WildCard						

- Go crazy with wildcards
